ARTIFICIAL INTELLIGENCE (AI)

We are harnessing the opportunities and benefits Artificial Intelligence (AI) can bring. The use of AI within our Trust is tightly controlled. We use AI to help automate some of the manual tasks we need to complete. AI helps us with data driven decision making, repetitive and rule-based tasks, and predictive analytics. We do not routinely use personal data when using AI. If we do use personal data, we ensure a Data Protection Impact Assessment has been completed to identify any risks in the process for data subjects.

USE OF AI AND AUTOMATION

At Inspire Partnership, we are **brave** in our use of technology to support our mission of 'excellence in every outcome.' We use digital platforms (such as Arbor, Every, and our HR systems) that may incorporate Artificial Intelligence (AI) to streamline administrative tasks, assist with data analysis, and support professional growth.

To ensure a **Professional** and fair working environment, we commit to the following:

- **Human Accountability:** We do not use 'solely automated decision-making' for any matter that has a significant effect on your employment, such as recruitment, performance management, or pay. All significant processes involve meaningful human review ('Human in the Loop').
- **Data Integrity:** Your personal data is processed within secure, vetted environments and is never used to train external or public AI models.
- **Supportive Innovation:** AI is used as a tool to reduce manual workload, allowing you to focus on what matters most; our children.

In accordance with the **Data (Use and Access) Act 2025**, you have the right to request information about the automated tools used in your role or to contest any automated processing. For further details, please contact the Compliance Officer.
